To Whom It May Concern:

### Clinical Trial Evaluation of Imuniti Wellness Pack

The IKS Lead Programme and the Nutrition Intervention Group both of the MRC are evaluating the safety and efficacy of the Imuniti Wellness Pack for Edge to Edge 1113 (Pty) Ltd.

The MRC has developed scientifically peer-reviewed protocols that are evaluated for their ethics for both the non-human primate and human studies. These protocols meet the stringent scientific scrutiny and as such these protocols are accepted by the MCC and also internationally.

The MRC therefore is under contract to scientifically study the Imuniti wellness pack using these sound scientific methodologies.

Regards
